Education

Dr. A. P. J. Abdul Kalam Technical University

2022 - 2026

Bachelor of Technology in Computer Science and Information Technology (CSIT)

Uttar Pradesh, India

Experience

Backend Developer Intern

July 2024 - Present

Dropdown.in, Noida

Hybrid

- Developed and maintained **scalable production-level backend systems** using both **Python** and **TypeScript**, implementing **real-time notifications feature** for mobile applications built with Flutter.
- Integrated **payment gateways** (Razorpay and Stripe) and implemented **real-time email notifications** with OTP validation, enhancing user experience and security.
- Enhanced backend performance, reducing API integration time by **80%** and increasing response time by **60%**.
- Leveraged **AWS services** (S3, EC2) for scalable deployments, ensuring high availability and reliability of backend systems.

Machine Learning Intern

November 2023 - February 2024

Bookeve, WOFO24

Remote

- Developed **machine learning** solutions, including a personalized **recommendation system** and an **automated logo generation algorithm** using **Python** and **AWS** services to boost user engagement.
- Implemented the **Mishal 7B NLP model** for automatic plan description generation, enhancing content creation with advanced **NLP techniques**.
- Deployed **machine learning microservices** on **AWS Lambda**, integrating with **DynamoDB**, **EC2**, and **API Gateway** to create a scalable **serverless infrastructure** that optimized performance.
- Collaborated on **Deep Learning** and **Backend Integration** projects, developing **microservices** with **Python** and implementing **MLOps** methodologies for efficient model deployment.

Achievements

- Achieved **2nd place** in the **Sparrowthon - GenAI Hackathon** (Organised by **Techdome Solutions**).
- Presented my **Research Paper** titled **Enhancing Crop Yield Using Advanced Machine Learning Recommendations** at the **International Conference on Automation and Computation (AutoCom-24)**, published on **IEEE Xplore**. [[Research Paper Link](#)].
- Achieved **3rd place** in the Cyber Security event **Breach The Firewall** competition conducted by **IMS Ghaziabad**.
- Achieved **3rd Prize** in **IIT'J Prometeo'24 24-hour Hackathon**, competing against 200+ teams.
- Served as a **Speaker** and **Organizer** at **Convolute'23 - Deep Learning** event, conducted by **MLCOE AKGEC**.
- Achieved **3rd Prize** at **Ideathon'23** hosted by **CSI AKGEC**.
- Finalist at **Amity Ideathon'23**, compete against 400+ teams.

Projects

- Watch the Drop [WTD]** | *Next.js 14, Python, Flask, ML, Web scraping* | [🔗 GitHub](#) | [🔗 Prototype](#)
Led to **3rd place** in the 24-hour hackathon at IIT Jodhpur, our team developed a full-stack application for **product tracking** and **price analysis** across multiple e-commerce platforms. My contributions included building an **RNN model** for price prediction, integrating a **chatbot** for **real-time product recommendations**, and conducting **web scraping** from major sites like Amazon and Flipkart. I also implemented **product tracking** and **notification features** in Python and integrated microservices into the Node.js backend.
- DocSense** | *Python, ChromaDB, LLM, NLP, LangChain, Steamlit* | [🔗 GitHub](#) | [🔗 Prototype](#)
Developed an innovative application for interactive **PDF querying** using a locally deployed **LLAMA3 8B LLM model**. This project employs **vectorization** to ensure scalability across PDFs of varying sizes and structures, featuring multiple scan options and various **embedding methods**. Managed deployment considerations and integrated **real-time chatbot functionality** to enhance user interaction.

Technical Skills

Programming Languages: Python, TypeScript, JavaScript, Dart, C/C++

Frameworks: Flask, FastAPI, Flutter, Node.js, Express

Cloud and Platforms: Amazon Web Services (AWS), Docker, Kubernetes

Databases: MySQL, PostgreSQL, MongoDB, Redis, SQLite, ChromaDB, DynamoDB, AWS RDS

Machine Learning and Deep Learning: Scikit-learn, TensorFlow, Keras, PyTorch, OpenCV, NLTK, spaCy, LangChain

Tools: Visual Studio Code, Google Colab, Kaggle, Git, GitHub, Postman, etc.
